INFORMATION REGARDING DILATING· EYE DROPS

DILATION IS THE STANDARD OF CARE TO ALLOW THOROUGH EVALUATION OF EYE TISSUE FOR A NUMBER OF EYE CONDITIONS. The use of dilation drops temporarily increases the size of your pupils, which allows an eye physician to more accurately investigate the health of your eyes. Dilating drops frequently blur vision for a length of time which varies from person to person and may make bright lights bothersome. It is not possible for your physician to predict how much your vision will be affected, and because driving may be difficult immediately after an examination, it's best if you make arrangements not to drive yourself. For a short time, wearing sunglasses may be a necessary comfort. Adverse reactions, such as acute angle-closure glaucoma may also be triggered and/or diagnosed by the dilating drops. Call our office immediately if you experience excessive pain, discomfort, nausea, or any other untoward symptoms. Thank you for your assistance during this important procedure.

By signing this form I hereby acknowledge that I am aware of the above information and authorize my physicians and/or their assistants to administer dilating eye drops to assist in the optimum evaluation of my eyes. My acknowledgment and authorization shall be without expiration, but I am aware that (as all other diagnostic or treatment procedures) AT ANY TIME I MAY ELECT TO NOT HAVE THIS IMPORT ANT PROCEDURE BY SIMPLY INFORMING THE TECHNICIAN AND/OR PHYSICIAN. If l elect to not use dilating drops for my examination, I also hereby affirm that I am aware that my decision may reduce the ability of my physician to optimally care for my eyes.
